

NLGI: 1,2,3

Product Description:

A good quality, smooth textured grease. It is made from solvent refined high viscosity index paraffinic base stock and lithium hydroxy stearate soap. It contains extreme pressure, anti-wear, anti-rust, and corrosion additives package to assure its best performance in heavy-duty and shock loading operation.

It is suitable for use in all type of plain ball and roller bearings used in gear boxes, pumps, electric motors, universal joints, blowers and other heavy duty applications.

Main Benefits:

- ❖ Good load bearing capability
- ❖ Resistance to water wash-out
- ❖ Wide temperature range under vibration & shock loading operation

Application:

It is suitable for use in all type of plain ball and roller bearings used in gear boxes, pumps, electric motors, universal joints, blowers and other heavy duty applications.
