

# Grease MP

NLGI: 1,2,3

Product Description:

A good quality, smooth textured grease. It is made from solvent refined high viscosity index paraffinic base stock and lithium hydroxy stearate soap. It contains extreme pressure, anti-wear, anti-rust, and corrosion additives package to assure its best performance in heavy-duty and shock loading operation.

It is suitable for use in all type of plain ball and roller bearings used in gear boxes, pumps, electric motors, universal joints, blowers and other heavy duty applications.

Main Benefits:

- ❖ Retains its structure under heavy shock loading and vibration
- ❖ Excellent resistance against wear, rust and corrosion
- ❖ Good resistance against water wash out

Application:

It is equally suitable for industrial and automotive applications, it is suitable for different types of plain, roller and ball bearings used in blowers, pumps, gear boxes and electric motors
